

30104 - DUHA 19-21 RAM 1500 Quad Cab – Fix for interference with heated rear seats

- 1) Pull the connector with its plastic mounting tab out of the hole in the riveted bracket.
- 2) The Du-Ha mounting strap will now clear the bracket.
- 3) Once the Du-ha installation is complete, separate the mounting tab from the connector (pry up the lock tab and slide it off) then zip tie the connector to the Du-Ha strap on each side.
